

# AV4/HS4 Configuration Tool

Accessory for AV4/HS4 encoders that allows the user to re-configure specific parameters of their encoder

## Re-configure your AV4/HS4 Encoder!

- | Web-based device that connects to most internet capable devices with an internet browser
- | On-board Diagnostic LED allows user to know status of device at a glance
- | Re-configure PPR, Phasing, and Line Driver with just a couple clicks
- | Simple web interface makes it easy for anyone to operate and change the parameters of their device
- | Compact and Light-weight design
  - | Auto Configure

## AV4/HS4 CONFIGURATION TOOL

The Avtron Encoders AV4/HS4 Configuration Tool allows any user to quickly and easily change the parameters of their AV4/HS4 Encoder with just a couple clicks!

The simple, web-based device connects wirelessly to any computer, smartphone, or tablet with an internet browser, giving the user flexibility in whatever application they're working in.

Allows the user to configure Pulses Per Revolution (PPR), Incremental Pulse Direction (Phasing), and Incremental Line Driver parameters to suit their needs. Avtron offers many different options to connect to device to their encoder, including 6 Pin, 7 Pin, and 10 Pin MS cables, 5 Pin and 8 Pin M12 cables, and 12 Pin and 16 Pin M23 cables. We also include a terminal block for customers with cables and flying leads. Please see a complete list of part numbers for these in the Configuration Tool User Manual.

Auto Configure
